This mission directive prescribes the mission and establishes the responsibilities for Air Force Reserve Command (AFRC) component repair squadrons (CRS).

**1. Mission:**

1.1. Peacetime. The mission of the CRS is to provide a level of readiness sufficient to perform organization and intermediate level maintenance on unit assigned aircraft, transient aircraft, and related aerospace ground equipment. CRS provide a trained mobility maintenance force on an "as required" basis and operational aircraft for the peacetime flying program.

1.2. Wartime/Emergencies. Governed by gaining command directives.

**2. Command.** CRS are assigned to AFRC logistic groups. Their peacetime structure maintains effective operations with the least expenditure of resources and minimizes organizational turbulence upon wartime mobilization. CRS functionally align for structural compatibility with their active duty counterparts.

**3. Assigned Forces.** While in peacetime status and during 2 weeks of annual training, CRS are under the direct control and supervision of the AFRC logistics group to which assigned. Under Presidential call-up pursuant to Title 10 U.S.C. 12304, administrative jurisdiction remains unchanged. Operational control transfers to the commander of the gaining command. Under mobilization authority, command jurisdiction transfers to the commander of the unit to which assigned.

**4. Relationship to Other Units.** Established command channels apply. Communicate directly with the active duty advisory unit/active duty advisors is authorized on matters directly relating to training, inspection, and safety. Send a copy of such correspondence to the respective unit to which assigned.

DAVID S. SIBLEY, Brig Gen, USAFR  
Assistant Vice Commander
